Profile Summary

Over 7 years of experience out of 5 years working as a Software developer in the Travel visa and Service domain. To enhance my knowledge, skills, and contribute to the success of an organisation, I am actively seeking a challenging and growth oriented career as a Software Developer. With a deep passion for usability and creating exceptional user experiences, I merge my technical expertise to deliver innovative and intuitive digital solutions.

EDUCATION

B.Tech Sep 2012 - Jun 2016

Biju Patnaik University of Technology, Odisha.

TECHNICAL SKILLS

Languages	JavaScript, HTML5, Css3,TypeScript.
Library	ReactJs,React-Native, MaterialUI, Mantine, Bootstrap,Ant Design,React Router,Redux,Axios, Thunk, Redux Toolkit, Tanstack Query, React Native navigation, React Native Paper, NextJS, NestJs, NodeJs, MySQL, Formik, Yup, MomentJS, Firebase.
Version Control System	Git, GitHub, BitBucket,AWS code commit.
Other Tools	Visual Studio Code, Postman, Xcode, Swagger .
Project management Tool	Jira

EXPERIENCE

Software Developer Jan 2022 – Aug 2024

Aritha consulting services Private Limited, Bengaluru

Projects:

T.I.M (Tax in minute)

Duration-(05/2024-08/2024)

Technology-ReactJS, React Native, Javascript, TypeScript, Redux Toolkit, Mantine UI, Formik, Yup, Firebase, NodeJS, MySQL.

Project Description: Led the development of "Tax in Minute," a robust tax management application designed to streamline tax services with a focus on user-specific needs. The application supports four distinct user roles—Customer, Admin, Consultant, and Service

Manager—and incorporates key features including secure payment processing and a mobile app exclusively for customers.

Key Features:

- **Multi-User Role Management:**
 - **Customer:** Utilizes a dedicated mobile app to manage personal tax information, file taxes, and book consultations with tax professionals.
 - **Admin:** Oversees user accounts, manages application settings, and monitors overall system performance.
 - **Consultant:** Provides tax-related advice and services, manages client interactions, review and updates tax information.
 - **Service Manager:** Coordinates consultant activities, monitors service quality, and ensures smooth operational workflow.
- **Mobile Application for Customers:**
 - Developed a user-friendly mobile app enabling customers to access tax services on-the-go, including tax filing, document upload, and consultation scheduling.
- **Payment Integration:**
 - Integrated secure payment gateways to handle service fees and subscription payments, ensuring a seamless and secure transaction experience.
- **Book a Call Feature:**
 - Implemented a scheduling system within the mobile app for customers to book consultations with tax consultants, enhancing accessibility and personalized support.

Projects:

Notification-Server

Duration-(01/2024 –05/2024)

Technology-ReactJS, Javascript, TypeScript, Redux Toolkit, Mantine UI, Formik, Yup, NodeJS, MySQL.

- The Notification-Server is a service specifically created to offer Push notifications, SMS messaging, and email services to subscribers. Subscribers can access and view essential details such as schedule dates and descriptions for notifications, emails, and SMS messages. Additionally, subscribers have the capability to configure their preferred service provider, including popular options such as Amazon and Twilio.
- Subscriber user need to login to enter the system.
- As a Subscriber user, ability to access and update my account details as needed. Additionally, user able to view the count of each service available in the dashboard. This functionality allows user to manage and maintain accurate information for user's account, while also providing user with a clear overview of the available services.
- Subscriber have ability to configure services by providing the necessary details and then save that information. This functionality allows me to customise and personalise the services according to my specific requirements.

Projects:**Flip-Event-Service****Duration - (10/2023 - 12/2023)****Technology-NestJS, Javascript, TypeScript, AWS**

- Flip-Event-Service is a comprehensive service designed to monitor events such as CI/CD, code changes, AWS, and Slack activities in GitHub, GitLab, Slack, and AWS. These events are stored in a database for further analysis.
- A Flip Webhook, implemented as a Lambda function and exposed through the API Gateway, has been created.
- This webhook performs basic validation to ensure that events originate from authorized sources and then pushes them to a Standard queue. The Flip event service, developed using NestJS, seamlessly integrates with various event sources for each customer. It retrieves specific data associated with these events from the sources at regular intervals of 15 minutes.

Projects:**IMAGILITY****Duration-(01/2022 - 10/2023)****Technology- React Native, JavaScript, Redux, Axios, Thunk, Formik, Yup.**

- Imagility is a cloud-based immigration platform leading the way in innovation, and offering Petitioners, Attorneys and Beneficiaries a never-seen before combination of automation, transparency, and collaboration. Imagility packages powerful Immigration tracking, case management, client management features among others, all rolled into one cloud-based platform, automating manual processes and improving visa outcomes for all stakeholders.
- Responsible for the development of React Components and maintain the state management using Redux.
- Developed 10 numbers of individual mobile applications like Petitioner, Student, Family etc.
- Completed all mobile applications for both android and iOS on react native and JavaScript for both app store and play store.
- Having expertise on Xcode and Transporter for iOS application publish to app store.
- Enhanced the quality of inventory application mainly used by users/ clients based on defects occurred.
- Created reusable components as package for all the apps to reduce time estimation of the projects.
- Directly interacting with the clients to analyze the business idea of the individual apps and demonstration of the apps to the marketing team.

Software Developer Sep 2021 - Oct 2021*TCTS, pune***Projects:****T2R****Technology-ReactJS, Javascript, Redux**

- TICKET 2 RESOLVE (T2R) is a tool that's provide Networking services to the Client.

- Responsible for the development of React Components and used Redux for state management to fulfill client requirement.

Software Developer Feb 2019 - Sep 2021

Greet Labs Private Limited, Bangaluru

Hands of experience in developing single page applications in React JS.

Interact with the designer to suggest changes and to make sure the view he has about designing is translated into actual functionality.

- * Involved in development, review and execution of the project module. Reusing, simplifying and implementing a new version of an existing application for better performance.
- * Good experience with GitHub.

Projects:

YELLOW CLASS

Duration-02/2019 - 09/2021 Technology-ReactJS, Javascript

- Yellow Class is a new-age fun-learning platform where kids can learn from a wide range of classes like dancing, drawing, personality development, creative writing and so on.
- Created a web application which allows marketing and support organizations to provide a visibility of their Product Hierarchies, order status and details of the delivery.
- Enhanced the quality of inventory application mainly used by dealers/ clients based on defects occurred.

CAD Engineer March 2017 - Nov 2018

Aabsys IT Pvt Ltd., Bhubaneswar

- Hands on experience in producing technical CAD drawing and models for digitization of CAD data(.dwg) into GIS format(.shp). And doing the quality check of the team members' files as per the client requirements.
- CAD/CAFM data digitization.
- Design infrastructure of workplace and new building's blueprint as per the client information.
- Created lots of built-in LISP interpreter by CMD for various project development.
