Profile Summary

Over 7 years of experience out of 5 years working as a Software developer in the Travel / visa and Service domain. To enhance my knowledge, skills, and contribute to the success of an organization, I am actively seeking a challenging and growth oriented career as a Software Developer. With a deep passion for usability and creating exceptional user experiences, I merge my technical expertise to deliver innovative and intuitive digital solutions.

EDUCATION

B.Tech Sep 2012 - Jun 2016

Biju Patnaik University of Technology , Odisha.

TECHNICAL SKILLS

Languages	JavaScript, HTML5, Css3,TypeScript.
Library	ReactJs,React-Native, MaterialUI, Mantine, Bootstrap,Ant Design, React Router, Redux, Axios, Thunk, Redux Toolkit, Tanstack Query, React Native navigation, React Native Paper, NextJS, NestJs, NodeJs, MySQL, Formik, Yup, MomentJS, Firebase, Webpack (Microfrontent), leaflet (Map), Jest, Razor pay.
Version Control System	Git, GitHub, BitBucket, AWS code commit.
Other Tools	Visual Studio Code, Postman, Xcode, Swagger .
Project management Tool	Jira, Figma

EXPERIENCE

Technical Lead Oct 2024 – Present

Data Template, Bengaluru ([Data Template](#))

Projects:

Musafir

Technology-ReactJS, React Native, Javascript, TypeScript, Redux Toolkit, Mantine UI, Formik, Yup, Firebase.

Project Description: Musafir is a versatile flight booking and travel management platform catering to **B2C (Business-to-Consumer), B2B (Business-to-Business), and B2E (Business-to-Employee)** segments. It streamlines the flight booking process with real-time pricing, personalized recommendations, and seamless integrations for both individual travelers and corporate clients..

Key Features:

- **Flight search and booking with real-time pricing**
- **Multi-airline fare comparison for budget-friendly travel**
- **Secure payment gateway integration**
- **Personalized travel recommendations based on user preferences**
- **Itinerary management and booking history tracking**
- **B2C (Consumers) – User-friendly platform for flight search, price comparison, and seamless bookings.**
- **B2B (Travel Agencies & Partners) – API integrations for travel agencies, bulk booking management, and commission-based models.**
- **B2E (Corporate Travel Solutions) – Tailored employee travel management, expense tracking, and company-specific travel policies.**
- **Multi-airline fare comparison for cost-effective travel.**
- **Secure payment gateway and flexible booking options.**
- **AI-driven recommendations and loyalty program integration.**

Software Developer Jan 2022 – Aug 2024

Aritha consulting services Private Limited, Bengaluru

Projects:

T.I.M (Tax in minute)

Duration-(05/2024-08/2024)

Technology- ReactJs, Javascript, TypeScript, Webpack , Jest , Leaflet , Tailwind , Material UI.

- Flip-Event-Service is a comprehensive service designed to monitor events such as CI/CD, code changes, AWS, and Slack activities in GitHub, GitLab, Slack, and AWS. These events are stored in a database for further analysis.
- A Flip Webhook, implemented as a Lambda function and exposed through the API Gateway, has been created.
- This webhook performs basic validation to ensure that events originate from authorized sources and then pushes them to a Standard queue. The Flip event service, developed using NestJS, seamlessly integrates with various event sources for each customer. It retrieves specific data associated with these events from the sources at regular intervals of 15 minutes.

Projects:**Notification-Server****Duration-(01/2024–05/2024)****Technology-ReactJS, Javascript, TypeScript, Redux Toolkit, Mantine UI, Formik, Yup.**

- The Notification-Server is a service specifically created to offer Push notifications, SMS messaging, and email services to subscribers. Subscribers can access and view essential details such as schedule dates and descriptions for notifications, emails, and SMS messages. Additionally, subscribers have the capability to configure their preferred service provider, including popular options such as Amazon and Twilio.
- Subscriber users need to login to enter the system.
- As a Subscriber user, ability to access and update my account details as needed. Additionally, users are able to view the count of each service available in the dashboard. This functionality allows the user to manage and maintain accurate information for the user's account, while also providing the user with a clear overview of the available services.
- Subscriber has the ability to configure services by providing the necessary details and then save that information. This functionality allows me to customize and personalise the services according to my specific requirements.

Projects:**Flip-Event-Service****Duration - (10/2023 - 12/2023)****Technology-NestJS, Javascript, TypeScript, AWS**

- Flip-Event-Service is a comprehensive service designed to monitor events such as CI/CD, code changes, AWS, and Slack activities in GitHub, GitLab, Slack, and AWS. These events are stored in a database for further analysis.
- A Flip Webhook, implemented as a Lambda function and exposed through the API Gateway, has been created.
- This webhook performs basic validation to ensure that events originate from authorized sources and then pushes them to a Standard queue. The Flip event service, developed using NestJS, seamlessly integrates with various event sources for each customer. It retrieves specific data associated with these events from the sources at regular intervals of 15 minutes.

Projects:**IMAGILITY****Duration-(01/2022 - 10/2023)****Technology- React Native, JavaScript, Redux, Axios, Thunk, Formik, Yup.**

- Imagility is a cloud-based immigration platform leading the way in innovation, and offering Petitioners, Attorneys and Beneficiaries a never-seen-before combination of automation, transparency, and collaboration. Imagility packages powerful Immigration tracking, case management, client management features among others, all rolled into one cloud-based platform, automating manual processes and improving visa outcomes for all stakeholders.
- Responsible for the development of React Components and maintaining the state management using Redux.
- Developed 10 numbers of individual mobile applications like Petitioner, Student, Family etc.
- Completed all mobile applications for both android and iOS on react native and JavaScript for both app store and play store.
- Having expertise on Xcode and Transporter for iOS applications published to the app store.
- Enhanced the quality of inventory applications mainly used by users/ clients based on defects occurred.
- Created reusable components as a package for all the apps to reduce time estimation of the projects.
- Directly interacting with the clients to analyze the business idea of the individual apps and demonstration of the apps to the marketing team.

Software Developer Sep 2021 - Oct 2021*TCTS, pune***Projects:****T2R****Technology-ReactJS, Javascript, Redux**

- TICKET 2 RESOLVE (T2R) is a tool that provides Networking services to the Client.
- Responsible for the development of React Components and used Redux for state management to fulfill client requirements.

Software Developer Feb 2019 - Sep 2021*Greet Labs Private Limited, Bengaluru*

Hands-on experience in developing single page applications in React JS.

Interact with the designer to suggest changes and to make sure the view he has about designing is translated into actual functionality.

- * Involved in development, review and execution of the project module. Reusing, simplifying and implementing a new version of an existing application for better performance.
- * Good experience with GitHub.

Projects:**YELLOW CLASS****Duration-02/2019 - 09/2021 Technology-ReactJS, Javascript**

- Yellow Class is a new-age fun-learning platform where kids can learn from a wide range of classes like dancing, drawing, personality development, creative writing and so on.
- Created a web application which allows marketing and support organizations to provide a visibility of their Product Hierarchies, order status and details of the delivery.
- Enhanced the quality of inventory application mainly used by dealers/ clients based on defects occurred.

CAD Engineer March 2017 - Nov 2018*Aabsys IT Pvt Ltd., Bhubaneswar*

- Hands-on experience in producing technical CAD drawing and models for digitization of CAD data(.dwg) into GIS format(.shp). And doing the quality check of the team members' files as per the client requirements.
- CAD/CAFM data digitization.
- Design infrastructure of workplace and new building's blueprint as per the client information.
- Created lots of built-in LISP interpreters by CMD for various project development.
